

Enabling Connectivity for Industrial Transformation

- Network Infrastructure • Edge Connectivity • Industrial Computing

Your Trusted Partner in Automation

Transforming your ideas into tomorrow's innovations with robust connectivity technologies

Moxa is a leader in industrial networking and communications, enabling connectivity for the automated world of today and tomorrow and enhancing cybersecurity for industrial automation systems. We achieve this by collaborating with customers and partners to transform their unique ideas into feasible network solutions for mission-critical applications.

Enabling Connectivity for **Automation Networks**

Communications and networking within the industrial automation world have become increasingly sophisticated and complex. This is because greater cross-system collaboration and integration can be achieved when networks are converged into a single-system architecture that is based on open standards and technologies. With distinctive technical capabilities and values that stand out from the competition, Moxa is uniquely positioned to deliver on this transformation towards converged automation networks.

The value we bring with our connectivity solutions is building reliable and secure networks that connect all the requirements for automation and improving productivity and efficiency in many industrial applications, such as smart rail, smart grid, intelligent transportation, smart manufacturing, oil and gas, and maritime.

Enabling Connectivity in **Critical Environments**

Moxa develops reliable connectivity solutions that enable devices to connect, communicate, and collaborate with systems, processes, and people, realizing critical connectivity for automation harsh environments and uninhabitable terrains — establishing connectivity from the ocean floor to the highest peak, as well as from earth to outer space. It helps make people's lives better and properties more secure by addressing the challenges of withstanding extreme temperatures, hazardous gases, and intense radiation.

With over 30 years of experience in connectivity for industrial automation, Moxa has connected more than 65 million devices worldwide and delivered lasting business value by empowering industry with leading-edge connectivity, industrial computing, and communication networks that provide maximum reliability and security.

Enabling IIoT Connectivity From Edge to Cloud

With rapid globalization and information digitalization, industrial operators have begun to adopt Industrial Internet of Things (IIoT) applications to enhance operational efficiency. Moxa is here to provide you with practical technologies to optimize network infrastructure and simplify industrial edge-to-cloud connectivity for accelerating OT/IT convergence. You also have our strong commitment to protecting connectivity from edge to cloud.

We take care of interoperability

So you can keep your legacy machines

And also interconnect with various platforms

We take care to keep it simple

So you can set up devices easily

And also reduce maintenance costs

We take care of device security

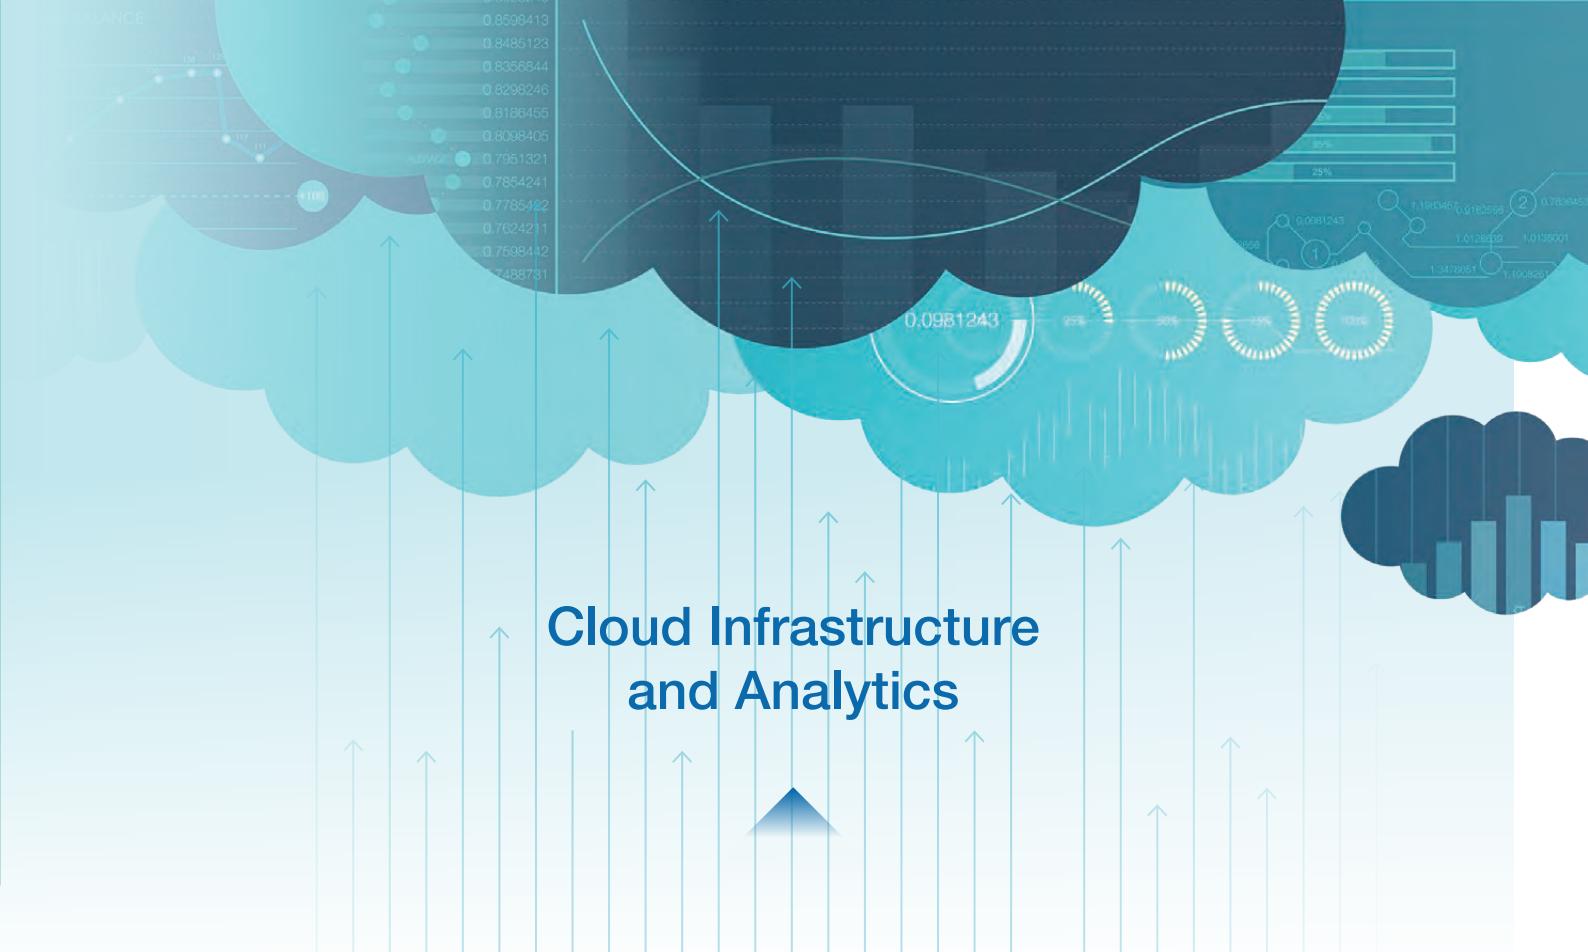

So you can operate with confidence

And also identify threats to your assets

We take care of reliability

So you can operate at -40°C

Or even at 75°C

Unmanaged Switches

Moxa has a large portfolio of industrial unmanaged switches that have been specifically designed for industrial Ethernet infrastructure. Our unmanaged Ethernet switches uphold the stringent standards that are required for operational reliability in harsh environments.

DIN-rail Managed Switches

Our DIN-rail managed switches feature industrial-grade reliability, network redundancy, and security features based on the IEC 62443 standard. The compact DIN-rail managed switches have a variety of copper and fiber port combinations that provide customers with greater flexibility when deploying networks.

Rackmount Managed Switches

The industrial rackmount switches provide modular flexibility with 24 to 52-port routing and switching capabilities, security features based on the IEC 62443 standard, and millisecond-level, fast multicast traffic redundancy to strengthen IIoT infrastructures as in city, transportation, manufacturing, and surveillance applications.

Ethernet Switches

Moxa provides a wide range of industrial Ethernet switches that feature industrial-grade reliability, network redundancy, strengthened security, easy management, and competitive price-to-performance ratios. Our comprehensive portfolio includes unmanaged switches, managed switches, PoE switches, rackmount switches, and switches designed for use in the rail industry that meet parts of the EN 50155 standard.

19

PoE Switches

We provide a wide range of PoE/PoE+ switches with up to 48-port fiber optic Gigabit PoE+ ports and up to 60 W output per port to deliver high-speed data transmission while powering high-power devices over long distances. With an industrial-grade design, our PoE switches provide surge protection of 3 kV per LAN port, and Smart PoE management features to simplify PoE network deployment and maintenance.

20

EN 50155 Ethernet Switches

Moxa is an IRIS-certified company that offers a large portfolio of rugged Ethernet switches that comply with the mandatory sections of the EN 50155 standard. These products have been deployed in many rail and metro systems around the world. With our innovative solutions and technologies, we help train builders achieve overall transport safety, efficiency, and significant cost and time savings on railway operation and maintenance.

24

Ethernet Extenders

Our Ethernet extenders simplify long-distance network deployment and reduce construction costs with existing twisted-pair copper wires. Our Ethernet extenders can achieve transmission speeds up to 100 Mbps and feature plug-and-play deployment, DSL bypass, millisecond-level redundancy, and multiple industry certifications, making them suitable for a variety of industrial applications.

1. Supports 12/24/48 VDC.

2. Cold start requires minimum of 100 VAC at -40°C.

3. Models with MCS and SSC fiber ports are compliant with IEEE 1613 Class 1.

Secure Routers

Moxa offers industrial secure routers with a high-performance design to protect critical automation assets and ensure secure remote access via VPN technology for smart factory, transportation, rail, as well as oil and gas applications. With the IEC 61162-460 certification, our secure router is the ideal choice to enhance the safety of maritime applications. In addition, the Ethernet router complies with the IEC 61375-2-5 standard making it suitable for deployment on Ethernet train backbones and consist networks.

WLAN AP/Bridge/Client

Moxa's extensive collection of industrial-grade wireless 3-in-1 AP/bridge/client products combine a rugged casing with high-performance Wi-Fi connectivity to deliver a secure and reliable wireless network connection that will not fail, even in environments with water, dust, and vibration.

29

30

Rail Wireless LAN AP/Client

Moxa's field-proven wireless LAN products enable operators to manage carriage-to-carriage and train-to-ground communications with increased efficiency, enabling you to create helpful onboard multimedia services that enhance the safety and comfort of your passengers.

Wireless AP/Bridge/Client

Moxa's industrial IEEE 802.11n wireless AP/bridge/client products are designed to overcome the challenges of harsh industrial environments. High electromagnetic immunity protects the devices against electromagnetic disturbances, galvanic isolation guards them against voltage instability, and wide-temperature ranges and shock and vibration resistance ensure reliable operation even in difficult environments.

Rail Wireless Access Controller

The goal of zero-latency roaming is to allow clients to seamlessly maintain a connection as they move from one access point to another. Moxa provides advanced wireless access controllers together with our controller-based Turbo Roaming technology, enabling millisecond-level roaming across different IP subnets.

Installation	DIN-rail mounting, wall mounting (with optional kit)

Cellular Gateways

Moxa's LTE gateways are easy to configure and provide an efficient way to implement high-performance long-distance network applications. These LTE gateways secure your communication channels, enable smart remote management, and provide reliable connections.

Cellular Gateways/Routers

Moxa's industrial cellular products are designed for wireless wide area network (WWAN) communication with serial and Ethernet devices over cellular networks. To meet the growing demand for increased bandwidth over cellular connections, Moxa's WWAN products now support 4G-LTE communication that enables cellular remote access for devices over the network.

Cellular Routers

Industrial applications involving mobile communications—such as moving vehicles, industrial M2M, and monitoring geographically dispersed sites—must be reliable and fail-safe even in dynamic and radio-hostile environments. Our industrial-grade cellular routers are able to meet this challenge, and enable reliable mobile data access anytime, anywhere.

Moxa's MXstudio industrial network management suite combines all the tools you need throughout the network's life cycle into one toolbox, including MXview industrial management software, the MXconfig industrial network configuration tool, and the N-Snap industrial network snapshot tool.

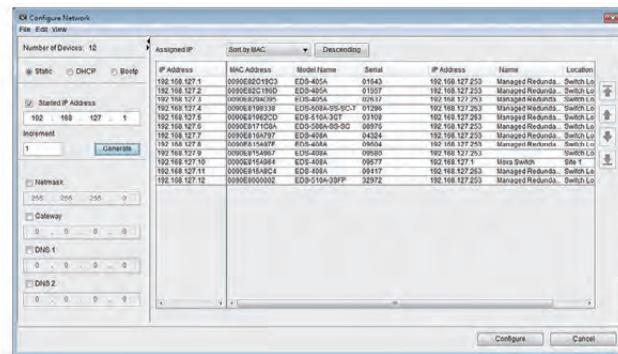

MXconfig Industrial Network Configuration Tool

Mass Configuration to Effectively Reduce Setup and Maintenance Costs

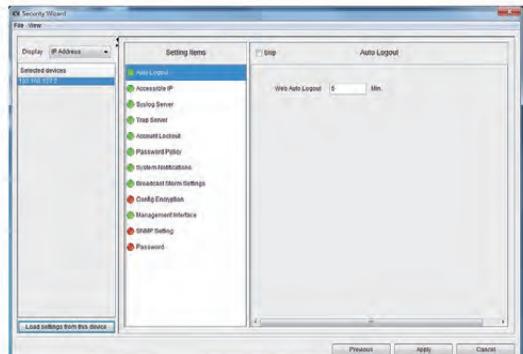

Moxa's MXconfig is a comprehensive Windows-based utility that is used to install, configure, and maintain multiple Moxa devices on industrial networks. MXconfig gives device installers and control engineers a powerful and easy way to mass configure devices, and it effectively reduces setup and maintenance costs.

Highlights

- Set the IP addresses of multiple devices with one click
- Configure redundant protocols and VLAN settings
- Modify the network configurations of multiple Moxa devices
- Upload firmware to multiple devices
- Set up security-related parameters with the Security Wizard in just a few clicks

Network Settings

Security Wizard

For a list of supported devices, please visit the MXconfig product page.

Network Management Software

Moxa's industrial network management software offers visibility of operational technology (OT), allowing network operators to make more informed decisions throughout network deployment, maintenance, and diagnostics. The visualized, engineer-friendly interface presents all network settings, conditions, and traceable records, making it easier for engineers to manage networks.

Network Management
Software Product Pages

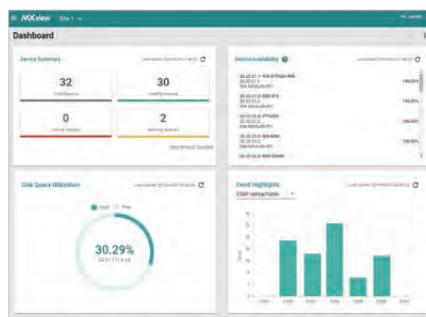

MXview Industrial Network Management Software

Visualized, Engineer-friendly Interfaces to Efficiently Manage Networks

Moxa's MXview is designed for configuring, monitoring, and diagnosing network devices on industrial networks. MXview provides an integrated management platform that can discover networking devices and SNMP/IP devices installed on subnets. All selected network components can be managed via a web browser from both local and remote sites—anytime and anywhere.

Highlights

- Easily integrate the software into third-party applications with a web widget and RESTful API interface
- Centralize management of device monitoring, configurations, and firmware for 10 different sites with up to 2,000 devices per site
- Check the network status via the dashboard
- Discover and visualize network devices and physical connections automatically
- Monitor the security status of network devices via Security View

Dashboard

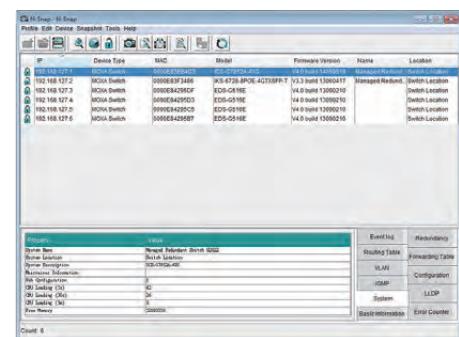

Security View

N-Snap Industrial Network Snapshot Tool

Network Snapshots to Quickly Identify the Root Cause of Network Disruptions

- A standalone data collection tool to take network snapshots for quick troubleshooting
- Compares network and device data, and highlights the differences

Moxa Remote Connect Suite

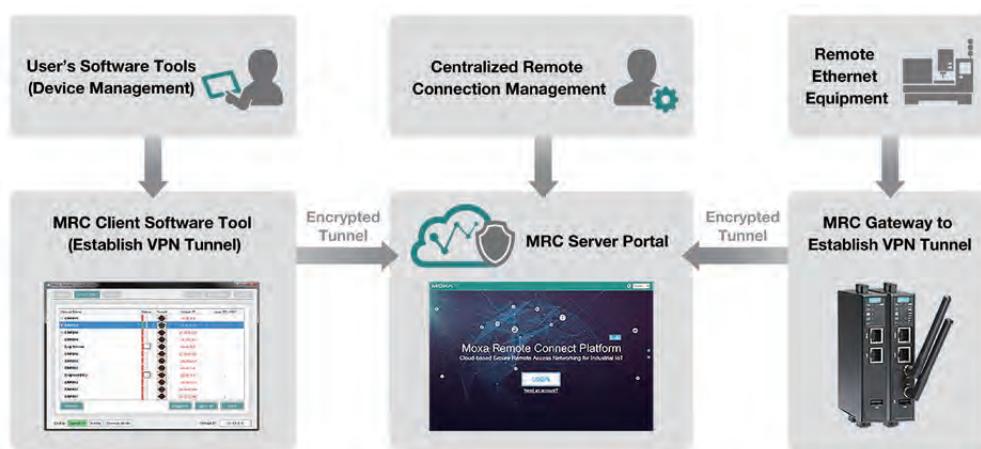

Effortless Access to Your Remote Machines

Moxa Remote Connect (MRC) is a convenient, secure, and versatile networking solution designed to seamlessly bridge field devices and engineers together over the Internet for industrial applications. The solution includes the MRC Server, MRC Gateway, and MRC Client. The MRC Server is a centralized connection management platform that determines the security level, user privileges, and configurations of the MRC Gateway and MRC Client. The MRC Gateway is a secure gateway that connects Ethernet-ready devices at remote sites to the MRC Client. The MRC Client is a software tool that allows engineers to choose which remote device to connect to from an engineer's laptop. A benefit of the MRC Server is that it gives administrators a lot of control over the remote connection including which periods of time a device can be accessed and the kind of features that are available.

Users can choose either the **BYOS (build your own server)** business model to have full control of their MRC, or **MRC Quick Link**, which is a remote connection service hosted by Moxa to minimize maintenance efforts and allow users to focus more on their business.

Highlights

- Machine access is fully controlled by machine operators for on-demand maintenance service
- Four types of access control are available to minimize the risks associated with remote access
- Specialized IT knowledge is not required to use the Suite
- Easy to integrate with existing security policies to reduce configuration efforts
- Changes to firewall settings are not required at field sites
- Connect with multiple field machines simultaneously via a virtual IP mapping scheme

Secure Remote Access

Moxa Remote Connect gives you a secure, easy-to-deploy, flexible, and scalable remote access solution that enables you to remotely configure, maintain, and troubleshoot your devices. It empowers machine builders by creating new business models for them to expand their services and keep their customers satisfied.

Secure Remote Access
Product Pages

User Scenarios

The MRC Suite supports multiple connection types and provides numerous benefits. Below are three examples where the Moxa Remote Connect Suite can benefit engineers and businesses.

◆ On-demand Remote Maintenance, Diagnosis, and Troubleshooting

To minimize security issues and reduce costs, Moxa Remote Connect allows engineers to build remote connections only when necessary.

◆ Remote Monitoring Minimizes Onsite Maintenance

Moxa Remote Connect helps engineers monitor the status of machines operating at remote sites. Continuous monitoring of machine status allows engineers to make adjustments to settings remotely, reducing the need for engineers to make site visits to troubleshoot and fix onsite issues.

◆ LAN-like Site-to-site Secure Network Infrastructure

Moxa Remote Connect enables communication between different machines even if the machines are not at the same location. With Moxa Remote Connect, machines can transmit data to and from each other, just as though they were communicating over a local area network (LAN).

Product Portfolio

MRC Client Software

A software tool that connects engineers to the MRC Server, enabling them to perform remote troubleshooting and maintenance tasks.

- Windows-based connectivity and control software
- Supported on Microsoft Windows 7/10 (32/64-bit)
- Download for free from Moxa's website

MRC Server Software

A connection management platform that provides a centralized management portal for users.

- Connection management platform
- Centralized security management
- Supports BYOS and MRC Quick Link Service
- MRC Quick Link includes 5 year free connection service

MRC Gateway

A secure gateway that connects Ethernet-based edge devices—such as HMs, PLCs, and cameras—to the MRC Server.

- Ethernet or LTE WAN connectivity
- Supports USA/Europe/Japan LTE bands
- An embedded whitelist firewall enables high levels of access control
- Site-to-site connections or connect up to 25 local devices per gateway

Visit our website to learn how to register your MRC gateways and use MRC Quick Link.

Read the White Paper to learn more about the key considerations when implementing secure remote access to your machines.

Watch a video that shows how Moxa Remote Connect is ideal for making remote access easy, secure, and flexible.

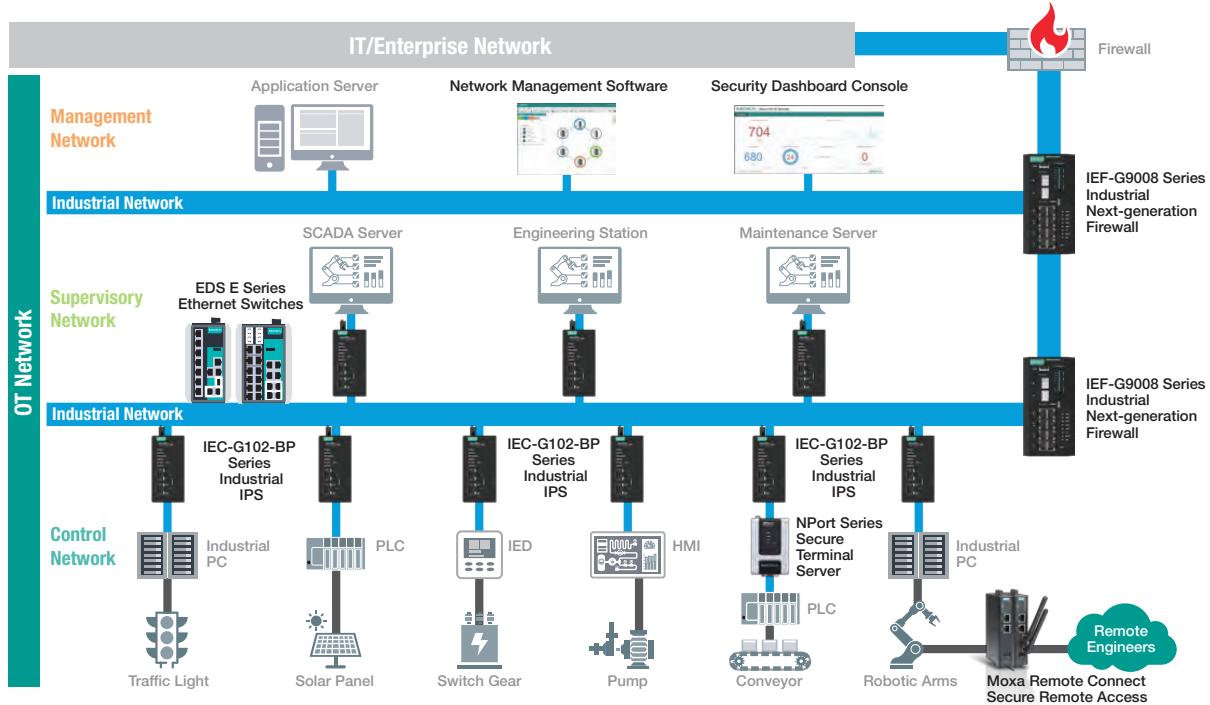

OT-IT Integrated Security

Protect OT assets from cyberthreats and mitigate cyberisks

Moxa has introduced a new product category, Network Security Appliance, that protects industrial networks from intruders and unwanted traffic. It is specifically designed to secure industrial networks from both an Operations Technology (OT) and Information Technology (IT) perspective to better address the surging market demand for a comprehensive cybersecurity solution for industrial networks. Moxa's solution includes critical IT cybersecurity technologies such as an Intrusion Prevention System (IPS), a key component for defense-in-depth strategies, which has been specifically tailored to protect OT networks from cyberthreats without disrupting industrial operations.

- **IEC-G102-BP Series** protects mission-critical assets with an Industrial IPS and whitelisting
- **IEF-G9008 Series** realizes segmentation and IPS protection with an OT firewall, NAT, and VPN
- **Security Dashboard Console (SDC)** provides central management of the IEC-G102-BP Series and IEF-G9008 Series with visibility of critical assets, network analysis, and auto pattern updates

Defend Industrial Networks at All Levels

Network Security Appliance

Moxa's Network Security Appliance is designed to protect your critical industrial assets from industrial cybersecurity threats with OT-IT integrated cybersecurity technologies such as OT-centric Deep Packet Inspection (DPI).

Network Security Appliance
Product Pages

IEC-G102-BP Series Industrial IPS

Highlights

- “OT-centric Deep Packet Inspection (DPI)” allows users to create a whitelist of industrial protocols and control the network traffic that can be sent to critical controllers.
- “Monitor” and “Protect” modes offer flexibility for different OT scenarios. The “Monitor” mode gives administrators visibility of potential cyberthreats. In the event of an emergency, administrators can easily switch to “Protect” mode to block and contain any malicious operations.
- Enhance OT Visibility by utilizing Asset Identification and Network Analysis technologies.
- Pattern-based virtual patching complements existing patch management processes by shielding against vulnerabilities. Virtual patching acts as a security tool that OT administrators and operators can use to quickly fix vulnerabilities on affected OT equipment.

IEF-G9008 Series Industrial Next-generation Firewall | Preliminary

Highlights

- Compact, security-hardened, and rugged hardware design.
- Includes all security features of IEC-G102-BP Series industrial IPS.
- Fine-grained Layer 2 to Layer 7 firewall policy with IPS capability.
- Industrial NAT and network segmentation.

Security Dashboard Console | Preliminary

Highlights

- A security management platform that allows administrators or operators to effectively manage and monitor all IEC-G102-BP Series and IEF-G9008 Series devices from one place.
- A user-friendly UI provides an easier way to monitor the devices and execute policy updates, firmware updates, and pattern updates.

47

Secure Terminal Servers

Moxa's terminal servers are equipped with the specialized functions and security features needed to establish reliable terminal connections to a network, and can connect various devices such as terminals, modems, data switches, mainframe computers, and POS devices to make them available to network hosts and processes.

51

Combo Switch / Serial Device Servers

Moxa's NPort S8000 Series combine a serial device server with a full-function managed Ethernet switch, allowing you to save space in your cabinet, reduce overall power consumption, and reduce costs by eliminating the need to purchase and deploy separate devices.

52

Combo I/O / Serial Device Servers

Moxa's NPort IA(W)5000A-I/O Series combines a serial device server, remote I/O, and wireless client into a single device. This design saves on installation space, simplifies device configuration, and reduces operational and maintenance costs.

53

Substation-level Device Servers

The NPort S9000 Series device servers come with a built-in full-function managed Ethernet switch, and are designed specifically for the harsh environmental conditions found in electrical substations.

Serial Device Servers

With a portfolio of over 500 serial/USB connectivity products, Moxa has been committed to providing reliable industrial solutions for device connectivity since 1987. As a worldwide industry leader, our portfolio includes products with industry-specific certifications for harsh environments, rail applications, intelligent transportation systems, and power automation.

Serial Device Servers
Product Pages

55

Railway Device Servers

The NPort 5000AI-M12 is compliant with EN 50121-4 and all mandatory sections of EN 50155, covering operating temperature, power input voltage, surge, ESD, and vibration, making it suitable for rolling stock and wayside applications.

56

General-purpose Device Servers

Our NPort device servers make your serial devices network-ready in an instant. Their compact size makes them ideal for connecting devices such as card readers and payment terminals to an IP-based Ethernet LAN.

62

Industrial-grade Device Servers

These industrial device servers offer enhanced surge protection and are designed to ensure reliable serial-to-Ethernet connectivity when operating in harsh environments, such as oil and gas and power automation.

64

Wireless Device Servers

Our wireless device servers are the ideal choice for connecting your serial or Ethernet devices—such as PLCs, meters, and sensors—to a wireless network, avoiding the hassle of running a network cable to each device.

65

Embedded Device Servers

Moxa's embedded serial-to-Ethernet device server modules are compact, power-efficient, and easy to integrate.

Magnetic Isolation Protection	1.5 kV (built-in)														
Expansion Modules															
10/100BaseT(X) (RJ45)	—	—	—	—	1 port: NM-TX01 (-T), 2 ports: NM-TX02 (-T)										
Multi-mode Fiber (SC)	—	—	—	—	1 port: NM-FX01-M-SC (-T), 2 ports: NM-FX02-M-SC (-T)										
Single-mode Fiber (SC)	—	—	—	—	1 port: NM-FX01-S-SC (-T), 2 ports: NM-FX02-S-SC (-T)										
Ethernet Software Features															
Configuration Options	Web Console (HTTP/HTTPS), Serial Console, Telnet/SSH Console, Windows Utility														
Management	ARP, BOOTP, DHCP Client, DNS, HTTP, IPv4/IPv6, SMTP, SNMPPv1/v2c/v3, TCP/IP, Telnet, UDP, PPPoE, ICMP														
Windows Real COM Drivers	Windows 95/98/ME/NT/2000/XP/Vista/7/8.1/10, Windows Server 2003/2008/2008 R2/2012/2012 R2/2016/2019, Windows Embedded CE 5.0/6.0, Windows XP Embedded														
Fixed TTY Drivers	SCO UNIX, SCO OpenServer, SCO UnixWare 7, QNX 4.25, QNX 6.x, Solaris 10, FreeBSD, AIX 5.x, HP-UX 11i, Mac OS X														
Linux Real TTY Drivers	Kernel version: 2.4.x, 2.6.x, 3.x, 4.x, and 5.x														
Android API	Android 3.1.x and later														
Serial Interface															
Connector	DB9 male					8-pin RJ45									
No. of Ports	1	2		4	8	16									
Serial Standards	RS-232/422/485														
Secure Operation Modes	Reverse SSH, Secure Pair Connection, Secure Real COM, Secure TCP Client, Secure TCP Server, SSH														
Standard Operation Modes	Disabled, Ethernet Modem, Pair Connection, PPP, Printer, Real COM, RTelnet, RFC2217, TCP Client, TCP Server, Terminal, UDP														
Baudrate	50 bps to 921.6 kbps (supports nonstandard baudrates)														
Data Bits	5, 6, 7, 8														
Stop Bits	1, 1.5, 2														
Parity	None, Even, Odd, Space, Mark														
Flow Control	RTS/CTS, DTR/DSR, XON/XOFF														
RS-485 Data Direction Control	ADDC@ (automatic data direction control)														
Power Parameters															
Input Current	285 mA @ 12 VDC	333 mA @ 12 VDC	428 mA @ 12 VDC	376 mA @ 12 VDC	730 mA @ 12 VDC	140 mA @ 100 VAC	192 mA @ 100 VAC								
Input Voltage	12 to 48 VDC														
Physical Characteristics															
Housing	Metal														
Dimensions (without ears)	67 x 100.4 x 29 mm (2.64 x 3.95 x 1.14 in)	77 x 111 x 29 mm (3.03 x 4.37 x 1.14 in)			158 x 103 x 35 mm (6.22 x 4.06 x 1.38 in)	440 x 195 x 44 mm (17.32 x 7.68 x 1.73 in)									
Weight	700 g (1.54 lb)	730 g (1.61 lb)			1,020 g (2.25 lb)	3,460 g (7.63 lb)	3,580 g (7.89 lb)								
Interactive Interface	—	—	—	—	LCD panel display (non-T models only), push buttons for configuration (non-T models only)										
Installation	Desktop, DIN-rail mounting (with optional kit), wall mounting					Rack mounting (with optional kit)									
Environmental Limits															
Operating Temperature	Standard Models: 0 to 55°C (32 to 131°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)					0 to 55°C (32 to 131°F)									
Standards and Certifications

Combo Switch / Serial Device Servers

Product Series	NPort S8455I (-T)	NPort S8455I-MM-SC (-T)	NPort S8455I-SS-SC (-T)	
Ethernet Interface				
10/100BaseTX Ports (RJ45 connector)	5	3	3	
100BaseFX Ports (multi-mode SC connector)	–	2	–	
100BaseFX Ports (single-mode SC connector)	–	–	2	
Magnetic Isolation Protection				
	1.5 kV (built-in)			
Standards				
	IEEE 802.1D-2004 for Spanning Tree Protocol IEEE 802.1p for Class of Service IEEE 802.1Q for VLAN Tagging IEEE 802.1w for Rapid Spanning Tree Protocol IEEE 802.1X for authentication IEEE 802.3 for 10BaseT IEEE 802.3ad for Port Trunk with LACP IEEE 802.3u for 100BaseTX and 100BaseFX IEEE 802.3x for flow control			
Switch Properties				
IGMP Groups	256			
Max. No. of VLANs	64			
Priority Queues	4			
VLAN ID Range	VID 1 to 4094			
Ethernet Software Features				
Configuration Options	Web Console (HTTP/HTTPS), Windows Utility, Serial Console, Telnet Console			
Management	BOOTP, Device Search Utility (DSU), DHCP Client, DHCP Option 82, HTTP, IPv4, LLDP, Port Mirror, RMON, SMTP, SNMPv1/v2c/v3, Syslog, TCP/IP, TELNET, Web Console			
Windows Real COM Drivers	Windows 95/98/ME/NT/2000/XP/Vista/7/8/8.1/10, Windows Server 2003/2008/2008 R2/2012/2012 R2/2016/2019, Windows Embedded CE 5.0/6.0, Windows XP Embedded			
Linux Real TTY Drivers	Kernel version: 2.4.x, 2.6.x, 3.x, 4.x, and 5.x			
Fixed TTY Drivers	SCO UNIX, SCO OpenServer, UnixWare 7, QNX 4.25, QNX 6, Solaris 10, FreeBSD, AIX 5.x, HP-UX 11i, Mac OS X			
Android API	Android 3.1.x and later			
Redundancy Protocols	RSTP, Turbo Chain, Turbo Ring			
Security	HTTPS, SSL, SSH			
Authentication	Local Account Accessibility, RADIUS, TACACS+			
Serial Interface				
No. of Ports	4			
Serial Standards	RS-232/422/485			
Baudrate	50 to 921.6 kbps			
Data Bits	5, 6, 7, 8			
Stop Bits	1, 1.5, 2			
Parity	None, Even, Odd, Space, Mark			
Flow Control	None, RTS/CTS, XON/XOFF			
Isolation	2 kV			
RS-485 Data Direction Control	ADDC® (automatic data direction control)			
Power Parameters				
Input Current	935 mA @ 12 VDC			
Input Voltage	12 to 48 VDC			
Physical Characteristics				
Housing	Metal			
Dimensions	73.1 x 134 x 125 mm (2.88 x 5.27 x 4.92 in)			
Weight	578 g (1.27 lb)			
Installation	DIN-rail mounting, wall mounting (with optional kit)			
Environmental Limits				
Operating Temperature	Standard Models: 0 to 60°C (32 to 140°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)			
Standards and Certifications				
EMC	EN 55032/24			
EMI	CISPR 32, FCC Part 15B Class A			
EMS	IEC 61000-4-2 ESD: Contact: 6 kV; Air: 8 kV IEC 61000-4-3 RS: 80 MHz to 1 GHz: 10 V/m IEC 61000-4-4 EFT: Signal: 1 kV IEC 61000-4-5 Surge: Power: 1 kV; Signal: 0.25 kV IEC 61000-4-6 CS: 150 kHz to 80 MHz: 10 V/m; Signal: 10 V/m IEC 61000-4-8			
Hazardous Locations	Class I Division 2			
Safety	EN 60950-1, IEC 60950-1, UL 508, UL 60950-1			
Warranty				
Warranty Period	5 years			

Combo I/O / Serial Device Servers

Product Series	NPort IA5150A-6I/O	NPort IA5250A-6I/O	NPort IA5150A-12I/O	NPort IA5250A-12I/O	NPort IAW5150A-6I/O	NPort IAW5250A-6I/O	NPort IAW5150A-12I/O	NPort IAW5250A-12I/O				
Memory												
microSD Slot	Up to 32 GB (SD 2.0 compatible)											
Input/Output Interface												
Digital Input	4 channels		8 channels		4 channels		8 channels					
Digital Output	2 channels		4 channels		2 channels		4 channels					
Alarm Contact	Relay output with current carrying capacity of 2 A @ 30 VDC											
Digital Inputs												
Sensor Type	Dry contact; Wet contact (NPN or PNP)											
Dry Contact	On: short to GND; Off: open											
Wet Contact	On: 10 to 30 VDC; Off: 0 to 3 VDC (DI to COM)											
I/O Mode	DI or event counter											
Counter Freq.	20 Hz											
Digital Outputs												
I/O Mode	DO or pulse output											
I/O Type	Sink											
Ethernet Interface												
10/100 BaseT(X)	2 RJ45 ports, auto MDI/MDI-X connection				1 RJ45 port, auto MDI/MDI-X connection							
Ethernet Software Features												
Configuration	Web Console (HTTP/HTTPS), Windows Utility, Telnet Console, Serial Console											
Windows Real COM Drivers	Windows 95/98/ME/NT/2000/XP/Vista/7/8/8.1/10, Windows Server 2003/2008/2008 R2/2012/2012 R2/2016/2019, Windows Embedded CE 5.0/6.0, Windows XP Embedded											
Linux Real TTY Drivers	Kernel version: 2.4.x, 2.6.x, 3.x, 4.x, and 5.x											
Fixed TTY Drivers	SCO UNIX, SCO OpenServer, SCO UnixWare 7, QNX 4.25, QNX 6.x, Solaris 10, FreeBSD, AIX 5.x, HP-UX 11i, Mac OS X											
Android API	Android 3.1.x and later											
Serial Interface												
No. of Ports	1	2	1	2	1	2	1	2				
Serial Standards	RS-232/422/485 (4 kV serial surge protection)											
Baudrate	50 bps to 921.6 kbps				50 bps to 921.6 kbps (supports nonstandard baudrates)							
Data Bits/Stop Bits	5, 6, 7, 8 / 1, 1.5, 2											
Parity	None, Even, Odd, Space, Mark											
Flow Control	None, RTS/CTS, XON/XOFF											
WLAN Interface												
WLAN Standards	–	–	–	–	802.11a/b/g/n							
Transmission Distance	–	–	–	–	Up to 100 meters (in open areas)							
Transmission Rate	–	–	–	–	802.11a/g: 54 Mbps 802.11b: 11 Mbps 802.11n: 6.5 to 150 Mbps							
Wireless Security	–	–	–	–	WEP encryption (64-bit and 128-bit), WPA/WPA2-Personal, WPA/WPA2-Enterprise (IEEE 802.1X/RADIUS, TKIP, AES)							
WLAN Modes	–	–	–	–	Ad-hoc mode, Infrastructure mode							
Power Parameters												
Input Current	300 mA @ 12 VDC											
Input Voltage	12 to 48 VDC											
Physical Characteristics												
Housing	Metal											
Dimensions	59.6 x 101.4 x 134 mm (2.35 x 4 x 5.28 in)

Product Series	NPort 5150AI-M12 (-T) (-CT)	NPort 5250AI-M12 (-T) (-CT)	NPort 5450AI-M12 (-T) (-CT)
Ethernet Interface			
10/100BaseT(X) Ports (M12 D-coded 4-pin female connector)		1	
Ethernet Software Features			
Configuration Options	Web Console (HTTP/HTTPS), Windows Utility, Telnet Console		
Management	ARP, BOOTP, DHCP Client, DNS, HTTP, HTTPS, IPv4, LLDP, SMTP, SNMPv1/v2c, TCP/IP, Telnet, UDP, ICMP		
Windows Real COM Drivers	Windows 95/98/ME/NT/2000/XP/Vista/7/8.1/10, Windows Server 2003/2008/2008 R2/2012/2012 R2/2016/2019, Windows Embedded CE 5.0/6.0, Windows XP Embedded		
Fixed TTY Drivers	SCO UNIX, SCO OpenServer, SCO UnixWare 7, QNX 4.25, QNX 6.x, Solaris 10, FreeBSD, AIX 5.x, HP-UX 11i, Mac OS X		
Linux Real TTY Drivers	Kernel version: 2.4.x, 2.6.x, 3.x, 4.x, and 5.x		
Android API	Android 3.1.x and later		
Serial Interface			
No. of Ports	1	2	4
Serial Standards	RS-232/422/485		
Baudrate	Supports standard baudrates (unit=bps): 50, 75, 110, 134, 150, 300, 600, 1200, 1800, 2400, 4800, 7200, 9600, 19200, 38400, 57600, 115200, 230.4k, 460.8k, 921.6k		
Data Bits	5, 6, 7, 8		
Stop Bits	1, 1.5, 2		
Parity	None, Even, Odd, Space, Mark		
Flow Control	RTS/CTS (RS-232 only), DTR/DSR (RS-232 only), XON/XOFF		
RS-485 Data Direction Control	ADDC® (automatic data direction control)		
Power Parameters			
Input Current	310 mA @ 12 VDC	360 mA @ 12 VDC	440 mA @ 12 VDC
Input Voltage	12 to 48 VDC		
Power Connector	M12 A-coded 5-pin male connector		
Physical Characteristics			
Dimensions (without ears or antenna)	80 x 216.6 x 52.9 mm (3.15 x 8.53 x 2.08 in)		
Weight	686 g (1.51 lb)		
Environmental Limits			
Operating Temperature	Standard Models: -25 to 55°C (-13 to 131°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)		
Conformal Coating	NPort 5000AI-M12-CT Series

Wireless Device Servers

Product Series	NPort W2150A (-T)	NPort W2250A (-T)
Ethernet Interface		
10/100BaseT(X) Ports (RJ45 connector)	1	
Magnetic Isolation Protection	1.5 kV (built-in)	
Ethernet Software Features		
Configuration Options	Web Console (HTTP/HTTPS), Windows Utility	
Management	DHCP Option 82, HTTP, IPv4, SMTP, SNMPv1/v2c/v3, Syslog, Telnet, Web Console	
Windows Real COM Drivers	Windows 95/98/ME/NT/2000/XP/Vista/7/8.1/10, Windows Server 2003/2008/2008 R2/2012/2012 R2/2016/2019, Windows Embedded CE 5.0/6.0, Windows XP Embedded	
Linux Real TTY Drivers	Kernel version: 2.4.x, 2.6.x, 3.x, 4.x, and 5.x	
Fixed TTY Drivers	SCO UNIX, SCO OpenServer, UnixWare 7, QNX 4.25, QNX 6, Solaris 10, FreeBSD, AIX 5.x, HP-UX 11i, Mac OS X	
Android API	Android 3.1.x and later	
Security	HTTPS/SSL, Local Account Accessibility, RADIUS, SSH	
WLAN Interface		
WLAN Standards	802.11a/b/g/n	
Modulation Type	DSSS OFDM	
Transmission Distance	Up to 100 meters (in open areas)	
Transmission Rate	802.11a/g: 54 Mbps 802.11b: 11 Mbps 802.11n: 6.5 to 150 Mbps	
Wireless Security	WEP encryption (64-bit and 128-bit) WPA/WPA2-Enterprise (IEEE 802.1X/RADIUS, TKIP, AES) WPA/WPA2-Personal	
WLAN Modes	Ad-hoc Mode, Infrastructure mode	
Serial Interface		
No. of Ports	1	2
Serial Standards	RS-232/422/485	
Baudrate	50 bps to 921.6 kbps (supports nonstandard baudrates)	
Data Bits	5, 6, 7, 8	
Stop Bits	1, 1.5, 2	
Parity	None, Even, Odd, Space, Mark	
Flow Control	None, RTS/CTS, XON/XOFF	
RS-485 Data Direction Control	ADDC® (automatic data direction control)	
Surge	1 kV	
Physical Characteristics		
Housing	Metal	
Installation	Desktop, DIN-rail mounting (with optional kit), wall mounting	
Dimensions (without ears or antenna)	77 x 111 x 26 mm (3.03 x 4.37 x 1.02 in)	
Weight	547 g (1.21 lb)	557 g (1.23 lb)
Environmental Limits		
Operating Temperature	Standard Models: 0 to 55°C (32 to 131°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)	
Power Parameters		
Input Current	179 mA @ 12 VDC	200 mA @ 12 VDC
Input Voltage	12 to 48 VDC	
Standards and Certifications		
EMC	EN 55032/24	
EMI	CISPR 32, FCC Part 15B Class A	
EMS	IEC 61000-4-2 ESD: Contact: 4 kV; Air: 8 kV IEC 61000-4-3 RS: 80 MHz to 1 GHz: 3 V/m IEC 61000-4-4 EFT: Power: 2 kV; Signal: 2 kV IEC 61000-4-5 Surge: Power: 2 kV; Signal: 1 kV IEC 61000-4-6 CS: 150 kHz to 80 MHz: 3 V/m; Signal: 3 V/m IEC 61000-4-8 PFMF IEC 61000-4-11 DIPs	
Radio Frequency	CE (ETSI EN 301 893, ETSI EN 300 328, ETSI EN 301 489-17, ETSI EN 301 489-1), ARIB RCR STD-33, ARIB STD-66

Chassis Media Converters

Our TRC series of rackmount chassis media converters provide up to 19 slots and a variety of media converter modules to choose from to fulfill your different media conversion requirements in high-density applications.

69

70

Serial-to-fiber Media Converters

Moxa's industrial-grade serial-to-fiber optic converters convert RS-232/422/485 to optical fiber, providing users with an easy and reliable way to communicate with their serial devices.

Serial Converters

Moxa's serial media converters enable devices with different serial interfaces to communicate effortlessly. Serial-to-serial converters help convert between RS-232 and RS-422/485; serial-to-fiber converters convert all three of these interfaces to optical fiber.

Serial Converters
Product Pages

71

Serial-to-serial Converters

Moxa's serial-to-serial media converters convert between RS-232, RS-422, and RS-485, avoiding compatibility issues that are often encountered when communicating between different serial interfaces.

72

CAN-to-fiber, PROFIBUS-to-fiber Converters

Moxa's fieldbus-to-fiber converters convert fieldbus to fiber with ease, and also feature easy configuration and effortless troubleshooting. Our industrial-grade ICF converters convert PROFIBUS to fiber, even in harsh environments.

Chassis Media Converters

CAN-to-fiber, PROFIBUS-to-fiber Converters

Product Series	ICF-1170I	ICF-1180I	ICF-1280I
Serial Interface			
Optical Fiber	100BaseFX ports Multi-mode ST connector	100BaseFX ports Multi-mode or Single-mode ST connector	100BaseFX ports Multi-mode or Single-mode SC or ST connector
Fiber Cable Requirements	50/125 µm, 800 MHz 62.5/125 µm, 500 MHz	—	—
Typical Distance	5 km	Multi-mode: 4 km, Single-mode: 45 km	Multi-mode: 4 km, Single-mode: 45 km
Wavelength (typical)	850 nm	Multi-mode: 820 nm, Single-mode: 1310 nm	Multi-mode: 820 nm, Single-mode: 1310 nm
Wavelength (TX range)	840 to 860 nm	—	—
Wavelength (RX range)	800 to 900 nm	—	—
Optical Power (TX range)	0 to -5 dBm	Multi-mode: -14 dBm, Single-mode: -7 dBm	Multi-mode: -14 dBm, Single-mode: -7 dBm
Optical Power (RX range)	0 to -20 dBm	Multi-mode: -28 dBm, Single-mode: -29 dBm	Multi-mode: -28 dBm, Single-mode: -29 dBm
Optical Power (link budget)	15 dB	Multi-mode: 14 dBm, Single-mode: 21 dBm	Multi-mode: 14 dBm, Single-mode: 21 dBm
Optical Power (dispersion penalty)	1 dB	—	—
CAN Interface			
No. of Ports	1	—	—
Isolation	2 kV (built-in)	—	—
Signals	CAN_L, CAN_H, CAN Signal GND	—	—
PROFIBUS Interface			
Industrial Protocols	—	PROFIBUS DP	PROFIBUS DP
No. of Ports	—	1	1
Baudrate	—	9600 bps to 12 Mbps	9600 bps to 12 Mbps
Isolation	—	2 kV (built-in)	2 kV (built-in)
Power Parameters			
Input Current	221 mA @ 12 VDC	221 mA @ 12 VDC	315 mA @ 12 VDC
Input Voltage	12 to 48 VDC	12 to 48 VDC	12 to 48 VDC
No. of Power Inputs	2	2	2
Physical Characteristics			
Housing	Metal	Metal	Metal
Dimensions	30.3 x 70 x 115 mm (1.19 x 2.76 x 4.53 in)	30.3 x 70 x 115 mm (1.19 x 2.76 x 4.53 in)	39 x 115 x 70 mm (1.54 x 4.53 x 2.76 in)
Installation	DIN-rail mounting	DIN-rail mounting (with optional kit), wall mounting	DIN-rail mounting
Environmental Limits			
Operating Temperature	Standard Models: 0 to 60°C (32 to 140°F) Wide Temp. Models: -40 to 85°C (-40 to 185°F)	Standard Models: 0 to 60°C (32 to 140°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)	Standard Models: 0 to 60°C (32 to 140°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)
Storage Temperature (package included)	-40 to 85°C (-40 to 185°F)		
Ambient Relative Humidity	5 to 95% (non-condensing)

1. Applies only to the MB3270/3660.

2. W5x08 = W5108/W5208 (supports IEEE 802.11a/b/g/n).

Protocol Gateways

Our patented fieldbus-to-Ethernet MGate gateways not only connect your serial devices to an Ethernet network, but also allow for multiple connections and can convert between various protocols, such as Modbus TCP and EtherNet/IP.

USB-to-serial Converters

Moxa's UPort USB-to-serial converters provide computers with high-performance, industrial-grade connections for up to 16 serial devices over a single USB port. A wide range of converters are available with features that include Hi-Speed USB 2.0 with data rates up to 480 Mbps, advanced UARTs for high-end serial performance, COM port mapping, fixed-base COM functionality, and more.

81

USB-to-serial Converters/USB Hubs

Moxa's UPort series of USB-to-serial converters and USB hubs provide true Hi-Speed USB 2.0 speeds up to 480 Mbps, 15 kV of ESD protection, and have a metal housing to endure harsh environments, making them ideal for use in ATMs, kiosks, POS stations, and data-acquisition applications.

USB Hubs Product Pages

83

Industrial-grade USB Hubs

The UPort Series USB hubs are industrial-grade, and designed with the ruggedness and reliability needed for industrial applications. Each port has ESD Level 4 protection and can provide true Hi-Speed USB 2.0 data rates up to 480 Mbps—even for heavy-load applications. The UPort Series includes models with dual power inputs, DIN-rail mounting options, and wide temperature models that can operate reliably even in harsh conditions.

PCI Express (PCIe) Serial Boards

Our PCI Express board is designed for POS and ATM applications, and is a top choice of industrial automation engineers and system integrators. It supports many different operating systems, including Windows, Linux, and even UNIX.

87

Universal PCI Serial Boards

Our Universal PCI serial boards are designed for POS and ATM applications and for use by industrial automation system manufacturers and system integrators.

89

Multiport Serial Boards

With over thirty years of experience in multiport serial board technology and development, Moxa is able to offer one of the most comprehensive selections of industrial-grade multiport serial cards on the market. We offer serial boards for a variety of slot types including PCI Express (PCIe) to PC/104.

91

CAN Interface Boards/Modules

Moxa's CANbus serial boards are a result of more than 30 years of fieldbus interface board experience. These serial boards are rugged, high-quality CAN interface modules with features that include ESD surge protection and long-term driver support.

Advanced Controllers and I/Os

Moxa's advanced controllers and I/O products make it easier to realize complex IIoT applications such as energy management, factory machine management, transportation management, and remote asset management through expandable communication and high-performance data acquisition and control capabilities.

95

98

Rugged Controllers and I/Os

Rail, wind power, and offshore applications demand system reliability and stability, even in harsh environments. Our rugged controllers and I/O products are designed to perform in extreme conditions while providing versatile data acquisition and control capabilities.

Controllers and I/Os

Moxa provides a wide range of controllers and I/O products for industrial automation applications. Our devices are built with push technology to facilitate faster I/O response times while still ensuring accurate data collection. Moxa's Click&Go Plus simplifies configuration of control logic rules and provides support for multiple OT/IT protocols, making it easier for you to realize your IIoT application. Our products have been successfully deployed in factories, energy and transportation applications, and city infrastructure.

Controllers and I/Os
Product Pages

Universal Controllers and I/Os

Our universal controllers and I/O products use Click&Go control logic, and includes our patented active monitoring technology and support for a versatile set of OT/IT protocols to help you easily configure, deploy, and realize IIoT applications such as energy monitoring, facility monitoring, and machine OEM applications.

Advanced Controllers and I/Os

Product Series	ioThinx 4533-LX	ioThinx 4533-LX-T
Computer		
CPU	NXP i.MX7D 1 GHz	
OS	Linux kernel 4.4 CIP, PREEMPT_RT, Debian 9	
Clock	Real-time clock with capacitor backup	
DRAM	512 MB DDR3	
Storage Preinstalled	8 GB eMMC (6 GB reserved for the user)	
Storage Slot	microSD slot x 1	
Expansion Slots	Up to 64	
Control Logic		
Language	C/C++, Python	
Ethernet Interface		
10/100BaseT(X) Ports (RJ45 connector)	2, 2 MACs	
Serial Interface		
Serial Standards	RS-232/422/485 (software selectable)	
Environmental Limits		
Operating Temperature	-20 to 60°C (-4 to 140°F)	-40 to 75°C (-40 to 167°F)
Storage Temperature (package included)		-40 to 85°C (-40 to 185°F)
Ambient Relative Humidity		5 to 95% (non-condensing)
Altitude		Up to 4000 meters ¹
Standards and Certifications		
Safety	UL 61010-2-201

Safety		UL 508
Shock		IEC 60068-2-27
Vibration		IEC 60068-2-6

1. For units operating in extreme temperatures, industrial-grade and wide-temperature range microSD cards are required.

2. Only applies to the 85M-5401 module.

3. This product is suitable for rolling stock railway applications, as defined by the EN 50155 standard. For a more detailed description, please visit our website.

Create a Secure Data Connection Between OT and IT Systems

Traditionally, it has been difficult for OT and IT engineers to write agent programs to poll the thousands of registers used for shop-floor data. The difficulty stems from the fact that shop-floor data is handled using fieldbus protocols, but the data needs to be written to an IT database. The difficulties are compounded considerably when it comes time to scale up a facility, particularly since the additional load created can put a tremendous strain on systems that rely on legacy data acquisition methods. MX-AOPC UA Suite can be used to collect data from shop-floor registers via a Modbus protocol. The data can then be provided to an OPC UA client, such as a SCADA system, or MX-AOPC UA Logger can be used to write the data to an IT database, all without the need for additional programming effort. As an added benefit, MX-AOPC UA Suite provides security policy options for encryption and certificate exchange to ensure the security of data connections and transmissions.

OPC UA Software

Moxa's OPC UA software works with our ioLogik remote I/O products to maximize the efficiency of data collection from remote devices. By leveraging the power of our patented active monitoring technology, the OPC UA software delivers faster response times and bandwidth savings.

OPC UA Software
Product Pages

Efficient Data Acquisition Through Push-type Transmission (report by interval or exception method)

Our patented MX-AOPC UA Server offers both polling and non-polling architectures alongside the standard OPC UA protocol, giving users the alternative of using push-based communication from Moxa's devices. With push technology, I/O status is updated to MX-AOPC UA Server only when there is an I/O status change, a pre-configured interval is reached, or when a request is issued by a user. This application of push technology cuts metadata overhead, resulting in faster I/O response times and more accurate data collection than traditional pull-based architectures.

Automatic Data Supplement From SD Cards Following Network Failures

One of the benefits of using RTUs is that data can be collected over a network from a central site. In an ideal operation, following a network failure, RTUs should be able to transmit data logs that were collected while the network was offline. Moxa's MX-AOPC UA Logger makes this not only possible, but easy. MX-AOPC UA Logger provides a standard OPC interface that interacts with MX-AOPC UA Server for real-time data collection. After each network connection, MX-AOPC UA Logger will compare historical data stored on the SD cards located in individual devices with the real-time data it has already stored locally, and then supplement any missing data by requesting that the RTU retransmit the lost data.

OPC UA Software supports the following devices:

Product Series	Page Number

Arm-based Computers

Our Arm-based computing family offers wireless-ready, compact, and fanless industrial computers built for space-critical automation applications. These computers are specially designed for long-term operation and come with both a 5-year hardware warranty and 10-year support for Moxa Industrial Linux, making them an ideal choice for remote-monitoring and data-acquisition applications.

x86 Computers

Our industrial-grade, fanless x86 computers have passed rigorous tests and strictly adhere to industrial standards to ensure they can provide long-lasting, reliable operation even in harsh environments, making them perfect for heavy industry, power substation and utilities, transportation, oil and gas, and maritime applications.

Industrial Computing

Moxa offers an extensive range of industrial-grade, fanless computers and displays for tough environments. These products are built to operate reliably in extreme conditions, such as continuous exposure to high or low temperatures, humidity, vibration, and power surges. Our products have been successfully deployed in automation systems for heavy industries, substations, solar energy management, water/wastewater management, transportation, oil and gas, and marine vessels.

Panel Computers and Displays

Our industrial-grade panel computers and displays are built to withstand the elements, and feature a ruggedized design that makes them ideal for HMI applications in outdoor, hazardous, and maritime environments. Certifications include Class 1 Division 2, ATEX Zone 2, IECEx Zone 2, DNV GL, and CCS.

ThingsPro® Gateway

◆ A Ready-to-run Data Acquisition Tool to Speed Up Your IIoT Development

For users who develop their own data acquisition and asset management software programs, ThingsPro Gateway provides the ability to transfer field data directly to remote databases without any additional programming on the gateway. This way, users can focus on developing applications without having to worry about how to get and transfer their data to back-end databases or cloud platforms such as Alibaba Cloud, Azure IoT Hub, AWS IoT, or Sparkplug via MQTT over TLS.

◆ System Architecture

System Software

To accelerate project development and speed up your time to market, Moxa provides programmers with a variety of user-friendly software tools, making it easy to develop customized data acquisition and wireless/cellular communication applications.

System Software
Product Pages

◆ Key Features

- **Ready-to-run Fieldbus-to-tag Framework**

Easy-to-use UI for data acquisition via Modbus RTU or Modbus TCP Master

- **Network and System Configuration**

Web UI to configure LTE, Wi-Fi, DHCP, DNS, OpenVPN, SSH, port forwarding, GPS, and system date/time settings, and Ethernet and Serial ports

- **MQTT Communication Protocol**

Supports generic MQTT communication and MQTT-based services: Alibaba Cloud, AWS IoT, Microsoft Azure IoT Hub, and Sparkplug

- **Enhanced Cloud Connectivity**

Store and Forward to prevent data loss and Tag Selector to send only selected tags to the cloud, in order to save Internet transmission fees, are some of the capabilities that can be enabled in Alibaba Cloud, AWS IoT, Microsoft Azure IoT Hub, or Sparkplug.

◆ Eligible Devices

ThingsPro Gateway v2.6¹ supports the following devices by default:

Series	Model Name	Product Version	Firmware Version	Page Number
MC-1100 Series	MC-1121-E2-T, MC-1121-E4-T	1.0.2	2.0	114
UC-2100 Series	UC-2101-LX, UC-2102-LX, UC-2104-LX	1.0.0	1.4	109

1. Available in Q3, 2020.

Wireless Antennas and Cables

Moxa offers a wide variety of cellular and WLAN antennas and cables that are easy to install and simplify the process of establishing wireless networks.

Backup Configurators

These automatic backup configurators are designed to perform configuration backup and restoration for Moxa's managed Ethernet switches and wireless AP/Bridge/Client devices.

Fiber Optic Adapters and Bypass Units

Our fiber optic adapters are optional accessories that provide more fiber optic connection options for Moxa's industrial Ethernet switches. In addition, Moxa's fiber bypass units add bypass relay functionality to any network node.

PoE Injectors and Splitters

Moxa's PoE injectors combine power and data over a single Ethernet cable and provide non-PoE power source equipment (PSE) the ability to supply power to powered devices (PD). In addition, Moxa PoE splitters give non-PoE powered devices (PD) the ability to pair PoE Power Sourcing Equipment (PSE).

Accessories

Moxa provides a wide range of accessories that include wireless antennas, backup configurators, fiber optic adapters and fiber bypass units, PoE injectors and splitters, power supplies and adapters, SFP modules, and mounting kits. All of these accessories play an important role to complement Moxa's industrial solutions and help guarantee reliable performance.

134

136

138

Power Supplies and Adapters

In order to ensure that space and power source input/output requirements for industrial control systems are met, Moxa offers a wide variety of power supplies and adapters.

SFP Modules

These small form-factor pluggable transceiver (SFP) Ethernet fiber modules support Fast Ethernet, Gigabit Ethernet, or 10 Gigabit Ethernet. They are designed to facilitate coverage across a wide range of communication distances.

Mounting Kits

Moxa's versatile mounting kits include options for desktop, wall, DIN-rail, VESA, and rack mounting, and have been designed to simplify installation of products in a variety of industrial environments and ensure that they can be installed in most locations.

Caps, Cables, and Connectors

Our caps and connectors include a selection of pin and code types with high IP ratings to ensure suitability for industrial environments. Our cables come in a variety of lengths with multiple pin options to ensure compatibility for a wide range of applications.

143

Other Accessories

These accessories include surge arresters, HDD/SSD kits, data line surge protectors, Wi-Fi modules, and adapters.

Terminating Resistors

Product Series	Terminating Resistors	
	A-TRM-50-NM	A-TRM-50-RM
Description	Termination resistor, 50 ohms, N-type (male)	Termination resistor, 50 ohms, RP-SMA (male)

Surge Arresters

Product Series	Surge Arresters	
	A-SA-NMF-01	A-SA-NFN-01
Frequency	0 to 6 GHz	0 to 6 GHz
Connector Type	N-type (female) to N-type (male)	N-type (female) to N-type (female)

Adapters

Product Series	Adapters	
	A-ADP-RJ45P-DB9F-ABC01	A-ADP-QMAM-RF
Description	RJ45-to-DB9 adaptor for the ABC-01	QMA (male) to RP-SMA (female) adaptor for antenna

Backup Configurers

Model Name	ABC-01	ABC-02-USB	ABC-01-M12	ABC-01-P-M12-CT-T	ABC-02-P-USB-M12-CT-T
Connector	RS-232 (RJ45)	USB 2.0 Type A (male)	Serial interface, M12 A-code (female)	Serial interface, M12 A-code (female)	USB Type, M12 A-code (male)
Storage	64 KB	1 GB	64 KB	64 KB	128 MB
Supported Models	EDS-400A/500A Series EDS-P500A Series EDS-G509 Series EDS-600/700/800 Series PT-G7509 Series PT-7528 Series PT-7710 Series PT-7728/7828 Series	EDS-500E Series EDS-G500E Series SDS-3000 Series EDS-P506E Series IKS Series ICS Series PT-G503 Series PT-G7728/G7828 Series	TN-5500A Series TN-4500A Series TN-5800A Series TN-5900 Series	TN-5500A Series TN-4500A Series TN-5800A Series TN-5900 Series	TN-G4516 Series TN-G6512 Series

Fiber Optic Adapters and Fiber Bypass Units

Fiber Optic Adapters

Model Name	ADP-SCm-STf-S	ADP-SCm-STf-M
Fiber Type	Single-mode	Multi-mode
Interface	SC male, ST female	SC male, ST female

Optical Fiber Bypass Units

Model Name	OBU-102-SC	OBU-102-ST	OBU-102-LC
Description	2-channel optical fiber bypass units		
Single-mode Fiber SC Female Connectors	4	—	—
Single-mode Fiber ST Female Connectors	—	4	—
Single-mode Fiber LC Female Connectors	—	—	4

PoE Injectors and Splitters

Model	INJ-24	INJ-24A	SPL-24
10/100/1000BaseT(X) Ports, RJ45 Connector	1	1	—
10/100/1000BaseT(X) PoE Ports, RJ45 Connector	1	1	—
10/100Baset(X) Ports, RJ45 Connector	—	—	1
10/100Baset(X) PoE Ports (PD), RJ45 Connector	—	—	1
Input Power	24/48 VDC	24/48 VDC	PoE 802.3af
Output Power	30 W for each PoE port (max.)	60 W for each PoE port (max.)	12.95 W @ 24 VDC

Power Supplies and Adapters

24/48 VDC DIN-rail Power Supplies

Model Name	24 VDC DIN-rail Power Supplies				48 VDC DIN-rail Power Supplies		
	HDR-60-24	NDR-120-24	MDR-40-24	MDR-60-24	NDR-120-48	NDR-240-48	
Physical Characteristics and Temperature Limits							
Dimensions	52.5 x 90 x 54.5 mm (2.07 x 3.54 x 2.15 in)	123.75 x 125.20 x 40 mm (4.87 x 4.93 x 1.57 in)	40 x 90 x 100 mm (1.57 x 3.54 x 3.94 inches)		123.75 x 125.20 x 40 mm (4.87 x 4.93 x 1.57 in)	127.81 x 123.75 x 63 mm (5.03 x 4.87 x 2.48 in)	
Weight	230 g (0.5 lb)	500 g (1.10 lb)	260 g (0.57 lb)	280 g (0.62 lb)	500 g (1.10 lb)	900 g (1.98 lb)	
Operating Temperature	-30 to 70°C (-22 to 158°F)	-20 to 70°C (-4 to 158°F)			-20 to 70°C (-4 to 158°F)		
Operating Temperature at Full Load (max.)	45°C (113°F)	45°C (113°F)	60°C (140°F)	55°C (131°F)	45°C (113°F)	50°C (122°F)	
Relative Humidity	20 to 90% (non-condensing)	20 to 95% (non-condensing)	20 to 90% (non-condensing)		20 to 95% (non-condensing)		
Power Requirements							
Output	Wattage	60 W	120 W	40 W	60 W	120 W	
	Voltage	24 VDC				48 VDC	
	Current Range	0 to 2.5 A	0 to 5 A	0 to 1.7 A	0 to 2.5 A	0 to 5 A	
	Ripple & Noise	150 mVp-p	120 mVp-p	150 mVp-p		150 mVp-p	
	Voltage Adjustment Range	21.6 to 29 V	24 to 28 V	24 to 30 V		48 to 55 V	
	Setup/Rise Time at Full Load	500 ms, 50 ms at 230 VAC 500 ms, 50 ms at 115 VAC	1200 ms, 60 ms at 230 VAC 2500 ms, 60 ms at 115 VAC	500 ms, 30 ms at 230 VAC 500 ms, 30 ms at 115 VAC	1200 ms, 60 ms at 230 VAC 2500 ms, 60 ms at 115 VAC	1500 ms, 100 ms at 230 VAC 3000 ms, 100 ms at 115 VAC	
	Typical Hold-up Time at Full Load	30 ms at 230 VAC, 12 ms at 115 VAC	16 ms at 230 VAC, 10 ms at 115 VAC	50 ms at 230 VAC, 20 ms at 115 VAC	16 ms at 230 VAC, 10 ms at 115 VAC	28 ms at 230 VAC, 22 ms at 115 VAC	
	Voltage Range	85 to 264 VAC (47 to 63 Hz), 120 to 370 VDC	90 to 264 VAC (47 to 63 Hz), 120 to 370 VDC	85 to 264 VAC (47 to 63 Hz), 120 to 370 VDC	90 to 264 VAC (47 to 63 Hz), 120 to 370 VDC	90 to 264 VAC (47 to 63 Hz), 120 to 370 VDC	
Input	Typical Efficiency	90%	88%	88%		89%	
	Typical Current	1.2 A at 115 VAC, 0.8 A at 230 VAC	2.25 A at 115 VAC, 1.3 A at 230 VAC	1.1 A at 115 VAC, 0.7 A at 230 VAC	1.8 A at 115 VAC, 1 A at 230 VAC	2.25 A at 115 VAC, 1.3 A at 230 VAC	
	Inrush Current (cold start)	30 A at 115 VAC, 60 A at 230 VAC	20 A at 115 VAC, 35 A at 230 VAC	30 A at 115 VAC, 60 A at 230 VAC	30 A at 115 VAC, 60 A at 230 VAC	20 A at 115 VAC, 35 A at 230 VAC	
Overload Protection	Rated Output Power	105% to 160%		105% to 150%		105% to 160%	
	Protection Type	Constant current limiting, recovers automatically after fault condition is removed					
Over-voltage Protection	Over-voltage Range	30 to 36 V	29 to 33 V	31.2 to 36 V		56 to 65 V	
	Protection Type	Shut down operating voltage, must power on to recover					
Reliability

Type	DB9 (male) DIN-rail wiring terminal	DB9 (female) DIN-rail wiring terminal	DM25 (male) DIN-rail wiring terminal	DB25 (female) DIN-rail wiring terminal
Connector	DB9 (male)	DB9 (female)	DB25 (male)	DB25 (female)
Rating	300 V, 20 A (IEC250V 10A)			
Operating Temperature	-40 to 105°C (-40 to 221°F)			
Suitable Wiring	24-12 AWG (IEC 0.5-2.5 mm²)			
Dimensions	77.5 x 45 x 51 mm (3.05 x 1.77 x 2.01 in)		77.5 x 90 x 51 mm (3.05 x 3.54 x 2.01 in)	

Model Name	Mini DB9F-to-TB	ADP-RJ458P-DB9M	ADP-RJ458P-DB9F	A-ADP-RJ458P-DB9F-ABC01
Pin Assignment				
Description	DB9 (female) to terminal block adapter for RS-422/485 applications	RJ45-to-DB9 (male) adapter	RJ45-to-DB9 (female) adapter	RJ45-to-DB9 (female) adapter
Operating Temperature	0 to 70°C (32 to 158°F)	-15 to 70°C (5 to 158°F)	-15 to 70°C (5 to 158°F)	0 to 70°C (32 to 158°F)

Other Accessories

Model Name	Description
ANT-GPS-OSM-05-3M	1572 MHz, active GPS antenna, 26 dBi, for GPS applications, 3 m
DA-681A HDD Kit	HDD/SSD installation package, supports a single HDD/SSD
DA-682A HDD Kit	DA-682A HDD kit
DA-720 HDD Kit	DA-720 HDD/SSD kit
DE-2-SATA	2 x 2.5" SATA III SSD/HDD socket module
FK-75125-02	Storage bracket, 4 large silver screws, 4 soft washers, 4 small bronze screws, 1 SATA power cable, 4 golden spacers (only for the V2406 and V2426)
HDD kit with lock	HDD/SSD kit (lock included)
HDD/SSD kit with heat dissipation vent (lock not included)	HDD/SSD kit with heat dissipation vent (lock not included)
HDD/SSD kit with heat dissipation vent and lock	HDD/SSD kit with heat dissipation vent (lock included)
ISD-1110-T/1130-T Series	Data line surge protectors (up to 4 kV)
ISD-1210-T/1230-T Series	Data line surge protectors (up to 20 kV)
USB Dongle Kit	Internal USB dongle kit installation package
V2616A HDD Kit	V2616A internal storage kit
Wi-Fi-BGN	Wi-Fi module, 2 SMA connectors with cable
Wi-Fi-BGN(252NI)	Wi-Fi module, 2 antennas with cable and connector, 2 black screws, 2 lock washers, 2 nuts, 1 thermal pad

Ethernet Switches

Moxa provides a wide range of industrial Ethernet switches that feature industrial-grade reliability, network redundancy, strengthened security, easy management, and competitive price-to-performance ratios. Our comprehensive portfolio includes unmanaged switches, managed switches, PoE switches, rackmount switches, and switches designed for use in the rail industry that meet parts of the EN 50155 standard. Unmanaged Switches

Moxa has a large portfolio of industrial unmanaged switches that have been specifically designed for industrial Ethernet infrastructure. Our unmanaged Ethernet switches uphold the stringent standards that are required for operational reliability in harsh environments.

Layer 2 Smart Switches

Moxa's smart switches simplify daily tasks with easy configuration, quick installation, and field-site monitoring. Designed for easy connections, SCADA/HMI monitoring, and enhanced controllability, Moxa's Layer 2 smart switches support multiple industrial protocols such as PROFINET, Modbus, EtherNet/IP, and also support counter, alarm, and statistics.

Your Trusted Partner in Automation

Moxa is a leading provider of edge connectivity, industrial computing, and network infrastructure solutions for enabling connectivity for the Industrial Internet of Things (IIoT). With over 30 years of industry experience, Moxa has connected more than 65 million devices worldwide and has a distribution and service network that reaches customers in more than 80 countries. Moxa delivers lasting business value by empowering industries with reliable networks and sincere service. Information about Moxa's solutions is available at www.moxa.com.
